**Subject:** U.S. vs Microsoft

As a university educator and researcher I have, over the past few years, been more than annoyed by the persistence of Microsoft to force the use of Internet Explorer. Even files that were not created in a browser suddenly "become" Explorer files when emailed to colleagues and will only open in Explorer. A great deal of my time has been wasted due to their unethical methods of forcing people to use their products.

I ask that you consider the future of the use of the Internet which is becoming ubiquitous. We should be able to choose the browser we prefer to use rather than being forced to use one that Microsoft has selected.

I teach on both the Mac and Windows platform. Most of my headaches come from the Windows network. If I have a choice, I always choose Mac. Don't take away our choices.

Rhonda Christensen
